CORPORATE COMMITMENT

Poly Concepts LLC makes every effort to support the environment with its manufacturing and shipping practices. Our entire line of outdoor furniture is constructed from a patented polypropylene material, Andure®, which is 100% recyclable and emits no VOCs or toxins.

We, at Poly Concepts LLC, are committed to producing eco-friendly products and processes that make a difference in the sustainability of our planet.

MANUFACTURING PROCESS

All products are manufactured in the USA in a 75,000 sq. ft. facility that uses scrap lumber and sawdust to supply 80-85% of energy required to heat the facility. All scrap, unusable parts, and products at end of life are returned to the raw material manufacturer located in a neighboring state which are then recycled into new sheets of the patented polypropylene material which constitutes an average of 30% of the sheet volume.

The majority of our products are shipped knocked down on skids, not cartoned, and reducing the large amount of packaging waste inherent in most of the furniture industry. This practice assures savings in paper waste, time and labor.

PRODUCTS

Poly Concepts LLC's entire line of durable outdoor furniture is constructed from a patented polypropylene material, Andure®. The products have a satin finish and are known for the durability, cleanability and sustainability in the healthcare, hospitality, recreational and residential markets. The furniture can remain outdoors in all weather conditions.

- 10 year warranty
- UV resistant
- Stain resistant
- Chemical Resistant
- Mildew Resistant
- Substantial Weight
- Will not peel, yellow, pit, crack or require painting
- 100% Recyclable
- Emits no VOCs or toxins

The majority of our products are shipped knocked down on skids, not cartoned, and reducing the large amount of recyclable cardboard waste inherent in most of the furniture industry. This practice assures savings in cardboard waste, time and labor.

As a company, we are committed to offering environmentally responsible products to promote the reusability and recycling ability of all our products. Recognizing that our products are manufactured from a patented material that is eco-friendly and recyclable, we have a unique opportunity to continue to explore new options and manufacturing processes as a supplier for earth-friendly products.
